## 1. SAFETY

This HD Xfinder has been manufactured to satisfy the international safety standards. Please read the following safety precautions carefully.

**MAINS SUPPLY:** 100 - 240V AC 50/60Hz

**OVERLOADING:** Do not overload wall outlet, extension cord or adapter as this may result in fire or electric shock.

**LIQUIDS:** Keep liquids away from the HD Xfinder. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

**CLEANING:** Disconnect the HD Xfinder from the wall outlet before cleaning .Use a light damp cloth (no solvents) to dust the HD Xfinder.

**VENTILATION:** The slots on top of the HD Xfinder must be left uncovered to allow proper airflow to the unit. Do not stand the HD Xfinder on soft furnishings or carpets. Do not expose the HD Xfinder to direct sunlight or do not place it near a heater. Do not stack electronic equipments on top of the HD Xfinder.

**ATTACHMENTS:** Do not use any attachments that are not recommended as these may cause hazard or damage the HD Xfinder.

**CONNECTION TO THE SATELLITE DISH LNB:** Disconnect the HD Xfinder from the mains before connecting or disconnecting the cable from the satellite dish.

FAILURE TO DO SO CAN DAMAGE THE LNB.

**CONNECTION TO THE TV:** Disconnect the HD Xfinder from the mains before connecting or disconnecting the cable from the satellite dish.  
FAILURE TO DO SO CAN DAMAGE THE TV.

**EARTHING:** The LNB cable MUST BE EARTHED to the system earth for the satellite dish.

**LOCATION:** Place the HD Xfinder indoor in order not to expose to lightening, rain or sunlight.

## 2. INTRODUCTION

Thank you for purchasing the HD Xfinder.

This HD Xfinder can fast spectrum analysis with 950 ~ 2150 MHz frequency span. Support Constellation Chart. it has a High resolution 7"TFT LCD and a lithium battery can work at outdoors. It has a 2GB of U disk , so you needless schlep hard disk when it work at outdoors. And also use as a DVB-S+T/C Xfinder on a TV.

This HD Xfinder is fully compliant with the international DVB standard and thus transmits digital images, sounds, information guides and teletext directly to your TV or Xfinder through the satellite broadcasting.

Now you can comfortably see and receive digitally transmitted music, news, movie and sports satellite broadcasts in your office or at your home.

In service search section, both the automatic service search method and the manual search mode are provided. Also it supports DiSEqC 1.0, 1.2 and USALS, enabling you to move your antenna in order to focus preferred satellite. You can save up to 6000 TV and Radio services and work around with the favorite, Lock, Delete, Move and Sort functions.

The menu is very modern and supports multiple languages. All functions can be carried out using the remote control and some of the functions can also be carried out using the front panel. The HD

---

Xfinder is easy to use and adaptable for future advances. Please be aware that new software may change the functions of the HD Xfinder.

If you have any difficulties concerning the operation of your HD Xfinder, please refer to the relevant section of this manual, including the 'Troubleshooting'. This Manual will provide you with useful information on using the HD Xfinder.

### **3. FEATURES**

- MPEG-Fully DVB-S / DVB-S2 HD compliant
- DVB-T/DVB-T2/DVB-C
- Fast spectrum analysis
- Support Spectrum information save, load and compare.
- Data parsing of frequency Selected
- Constellation Chart
- High resolution 7"TFT LCD
- Large lithium battery capacity (5500mAh)
- Auto Calculate Angle of AZ ,EL
- 6000 channels (TV and Radio) programmable
- Multilingual menu text support
- Channel switching time less than 1 second
- Channel list editing
- Favorite channel list editing
- True-color On-Screen Display (OSD)
- Full Picture In Graphic (PIG) function
- Electronic Program Guide (EPG) for on screen channel information
- Subtitle supported
- Teletext supported by VBI insertion and software emulation
- Program and Channel information transfer from Xfinder to Xfinder
- DiSEqC 1.0, 1.1, 1.2 and USALS
- HDMI HD Video/Audio Output
- Easy upgrading by Ethernet & USB & RS 232 Port
- USB 2.0 Host
- Built in U disk (2GB)
- LAN 10/100Mbps Ethernet
- RTC (Real-Time-Clock)
- Time Shift
- Video Recording
- Recording one channel and Time Shifting another channel
- One key to start or stop recording of TS stream

## 4. Remote Control

You can power on/off the Xfinder, operate on screen menu, and use a variety of hot key function.

### **POWER**

To switch the Xfinder power on/off

### **MUTE**

Used to enable or disable the audio

### **NUMERIC KEYS**

Used to select channels or enter programming parameters

### **TV / RADIO**

Xfinder switches between TV and Radio mode.

### **0 (ZOOM)**

Press 0 key select zoom times, from X1 to X16.

### **AUDIO**

Audio channels setup, to select audio mode; Left, Right, Stereo, Mono.

### **F1**

To switch LCD on/off

### **F2**

To switch fan on/off

### **F3**

To start or stop recording of TS stream

### **F4**

To display channel status or various program information of current service.

### **F5**

To switch AV output/input

### **EPG**

Display the Programs guide on screen when available.

### **MENU**

Displays the Main Menu on the screen, or return to the previous menu or status.

### **EXIT**

Cancel the user selection and return to the viewing mode from a menu.

### **OK**

To select menu option, or to updated on entry.

### **<,> KEY**

To adjust volume level, or to move cursor left or right in the menu.

### **^,v KEY**

To change channels, or to move cursor up or down in the menu.

### **PAGE+/PAGE-**

To move up the cursor to the next or previous page in the menu or channel list.

### **• REC**

To start the recording.

### **Red Key**

Has different functions per menu.

### **TXT(YELLOW KEY)**

Shows teletext information of the current channel supports.

### **Subtitle(Green KEY)**

Subtitle Display.

### **V.FORMAT (blue Key)**

Press V.FORMAT button to switch the display mode among "Auto", "ByNativeTV720p\_50", "720p\_60", "1080i\_50", "1080i\_60", "1080p\_50" and "1080p\_60".

### **► Play**

To play the MP3, JPEG, or Record files.

### **■ Stop**

To stop the Time Shift, recording, or MP3/JPEG player.

## || PAUSE

Used to select the freeze function.  
Press once to freeze the screen picture.

## ◀ FB

To start Fast Backward function.

## ▶ FF

To start Fast Forward function.

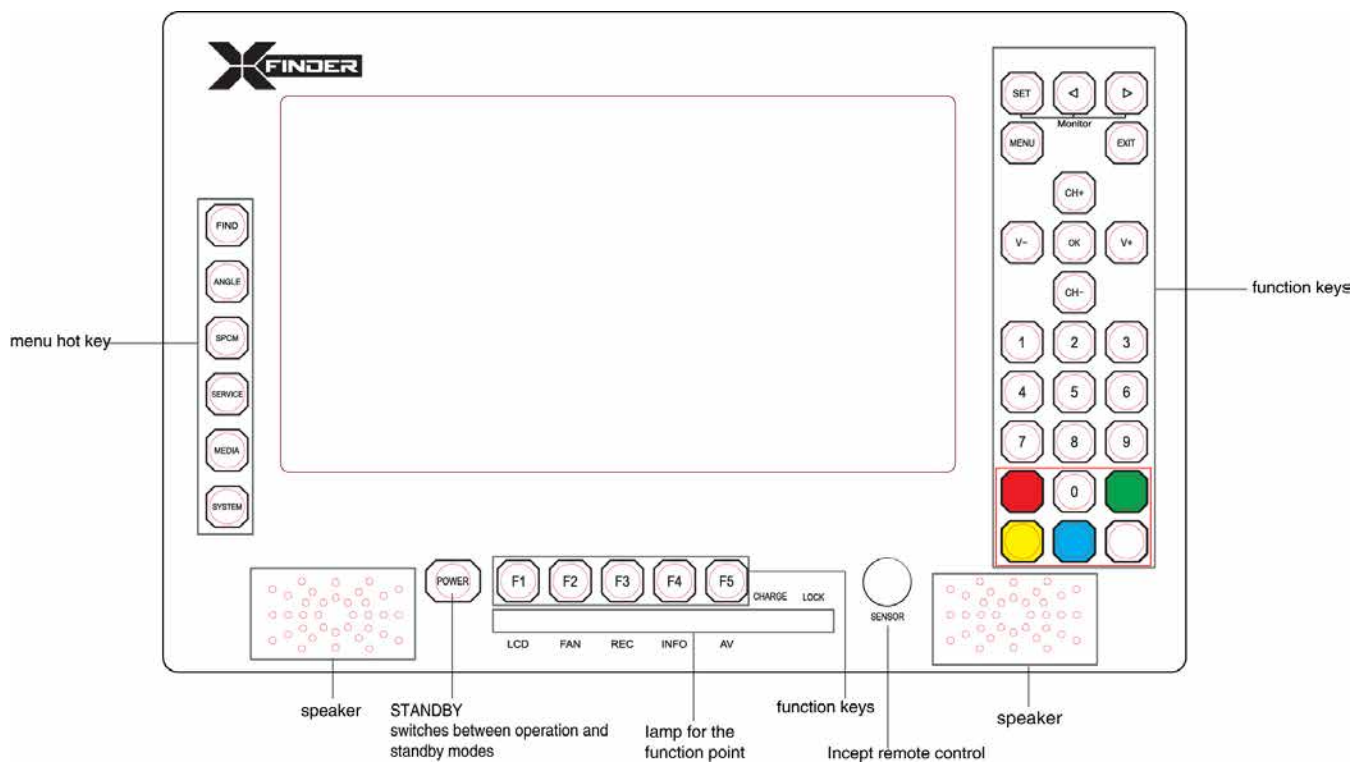

## 5. Front panel

### ⏻ POWER

To switch the Xfinder power on/off

### NUMERIC KEYS

Used to select channels or enter programming parameters

### 0 (ZOOM)

Press 0 key select zoom times, from X1 to X16.

### FIND

shortcut key enter to Xfinder menu.

### ANGLE

shortcut key enter to Angle menu.

### SPCM

shortcut key enter to Spectrum menu.

### SERVICE

shortcut key enter to Service.

### MEDIA

shortcut key enter to Media menu.

### SYSTEM

shortcut key enter to System menu.

### F1

To switch LCD display on/off

### F2

To switch fan on/off

### F3

To start or stop recording of TS stream

**F4**

To display channel status or various program information of current service.

**F5**

To switch AV output on/off

**MENU**

Displays the Main Menu on the screen, or return to the previous menu or status.

**EXIT**

Cancel the user selection and return to the viewing mode from a menu.

**OK**

To select menu option, or to updated on entry.

**V-, V+ KEY**

To adjust volume level, or to move cursor left or right in the menu.

**CH+, CH-KEY**

To change channels, or to move cursor up or down in the menu.

**PAGE+/PAGE-**

To move up the cursor to the next or previous page in the menu or channel list.

**AUDIO(Red)**

Audio channels setup, to select audio mode; Left, Right , Stereo, Mono.

**Red Key**

Has different functions per menu.

**TXT(YELLOW KEY)**

Shows teletext or subtitle information of the current channel supports.

**Subtitle(Green KEY)**

Subtitle Display.

**V.FORMAT (blue Key)**

Press V.FORMAT button to switch the display mode among "Auto", "ByNativeTV"720p\_50", "720p\_60", "1080i\_50", "1080i\_60", "1080p\_50" and "1080p\_60".

**FUN**

To select brihrtness,contrast and colour of LCD screen.

**<,> KEY**

To adjust brihrtness,contrast and colour of LCD screen.

## 6. Rear Panel

Please refer to the diagram above for all possible connections of your Xfinder  
 Do not connect the unit to the mains socket until all other connections have been made and checked.  
 Your configuration can vary depending on model

**DC 12V:** Connect the external power supply (DC 14.5V/4A)

**RF OUT:** This enables the connection of another Xfinder.

**RF IN:** This port is to connect the coaxial cable from terrestrial antenna/cable antenna

**LOOP:** This enables the connection of another Xfinder.

**LNB IN 13/18V 300mA MAX:** This port is to connect the coaxial cable from LNB of your Dish.

**AV IN/Out:** This port is used to connect the AV port of the television with a AV switch line that one enter port and three output port.

**HDMI:** Audio and Video output socket for TV set with HDMI Input Jack only.

**RS 232C:** SERIAL PORT: This is used to connect your Xfinder to a computer through a serial cable

**Ethernet:** Network port, you can get a new software updates from this port.

**USB:** USB 2.0 Host, connect to USB hard disk, or flash disk.

**U disk:** Built in U disk (2GB)

**SWITCH:** To switch U disk /equipment

**CA:** One slot CA Interface for Conax.

**CI:** One socket for Conditional Access Modules CAM

## 7. Connecting Your System

This section describes how to connect your product to match your particular devices setup and to gain optimum signal quality. The product provides various interfaces to connect to the TV, VCR or other devices. Select the most appropriate depending on the device you have.

**Warning:** Connect all components before plugging any power cords into the wall outlet.

Always turn off the product, TV and other components before you connect or disconnect any cables.

**Note:** If you encounter any problems setting up your product, please contact your local retailer helpline.

---

## 7.1 Connecting the Antenna

1. Connect one or two satellite coaxial cable from the wall to LNB IN.
2. Connect a cable/terrestrial coaxial cable to AERIAL IN.

Note: Cable and terrestrial can't concurrence.

### Connecting the TV

1. **TV with the HDMI connector:**  
For the best picture quality, connect the product and TV using an HDMI cable.
2. **TV with the AV connector:**  
To output video and audio, connect the product and TV using an AV cable.

### Note:

1. Connecting your TV directly to the audio/video output of the product will assure a more vivid picture and enhance your viewing enjoyment.

### Connecting to the LAN:

Connect one end of the Ethernet cable to the product and the other end to the LAN router.

### TV with Motorized System (DiSEqC 1.2)

Connect one end of your coaxial cable to the LNB IN connector on the Xfinder and the other end to the REC or Xfinder connector on the DiSEqC 1.2 motor.

Connect the coaxial cable from the LNB to the LNB connector on the DiSEqC 1.2 motor.

All our Xfinders are designed to be DiSEqC 1.0 and DiSEqC 1.2 compatible.

This allows multiple antennas to be connected to the Xfinder at the same time.

If you have two or more fixed antennas or LNBS, then we recommend you use a DiSEqC 1.0 switch.

Connect the coaxial cable from the first LNB to the LNB 1 or LNB A input connector of the DiSEqC switch.

Do the same for any other LNBS that you have.

Connect one end of a coaxial cable to the RF output connector of the DiSEqC switch, connect the other end to the LNB IN socket on the Xfinder.

To the digital Xfinder, you can connect either a single satellite antenna directly or LNB of multi-feed equipment.

---

## 8. Basic Operations

### 8.1 Turn on Xfinder

First, press the Device's Main [Power] button to turn on the unit. When the Xfinder is first used, there will play the first channel from the default Channel List. If the Xfinder is not first used, Xfinder will play the same channel as last time before turning off.

#### ? Frequently Asked Question

**Q: The power of my Xfinder has been turned on and not in Standby mode, but the TV screen showed nothing:**

A: Make sure the TV set has been set to the correct video input (not the TV channels). For example, if you have connected the unit with the Video1 input of the TV set, the TV set has to be switched to Video1.

**Q: The power of my Xfinder has been turn on and not in Standby mode, but the TV screen showed nothing except one box with "No Signal" image.**

A: That means the channel, which you select, is no signal. It could be several causes:

- 1 The channel which you select is not in your allocate satellite. The simply solution is to change channel.
- 2 The signal of current TV channel is too weak. You can try to change channel to other strong signal channels. If the problems still exist, please consult your local dealer or other professionals for technical service.
- 3 You use the Dual LNB, and you need Modify LNB Type

### 8.2 Power

- 1 Press [Power] Key can enter the Standby state

- 2 In Standby state, press [Power] Key again can call back the unit and go on play the previous channel
- 3 User can also disconnect the device's main power to end the Standby state.

### 8.3 Channel Up/Channel Down

In full screen, press [CH+/CH-] to change channel.

### 8.4 Volume Up/Volume Down

In full screen, press [VOL+/VOL-] to adjust volume.

### 8.5 Number

In full screen, use number key and press [OK] on the Remote Control Unit to change channel.

### 8.6 Mute

- 1 Press [MUTE] key to mute the sound and the screen will show up mute OSD.
- 2 Press [MUTE] key again to restore sound.

### 8.7 Pause

- 1 In playing mode, press [Pause] key, the picture will be paused, but the sound of the channel will still continues.
- 2 Press [Pause] key again, the screen's picture will skip over to the current playing picture, and the sound of the channel will correspond playing.

### 8.8 Audio

- 1 In full screen, press [AUDIO] key can open the "Audio" window on the screen.

- 2 You can modify the audio track by press [CH+/CH-] key and modify the audio mode by press[VOL+/VOL-] key.
- 3 Mode: Left/Right/Stereo/Mono

## 8.9 Information

In full screen, press [F4] key can open information screen, in the window shows the parameters of current channel.

## 8.10 EPG

- 1 The Xfinder has an Electronic Program Guide (EPG) to help you navigate channels through all the possible viewing options. The EPG supplies information such as channel listings and starting and ending times for all available channels. Press [EPG] key to display EPG screen.

- 2 Press [Red] key can select the channels by different group, such as by Favorite /Satellite /Provider /CAS etc.
- 3 Press [Green] key to select different display mode among Now EPG, Next EPG, More and Schedule, like the following picture:

- 4 Press [Yellow] key in EPG menu can set one record timer or go to Timer List menu.

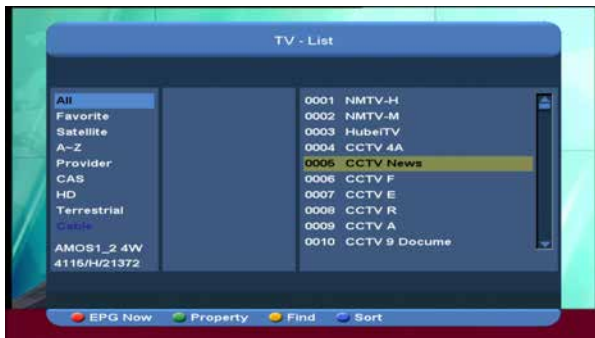

- 5 In EPG menu, when you select one event by high light item, you can set this event to record timer list directly by press [REC] button.
- 6 In EPG menu, press [Exit] to close EPG screen.

### 8.11 TV/RADIO

In TV mode, pressing [TV/RADIO] key can switch to Radio mode. In Radio mode, press [TV/RADIO] key to switch to TV mode.

### 8.12 Channel List

- 1 In full screen, press [OK] key can enter "Channel List".

- 2 Press [CH+/CH-] key to change the different group. Which you can watch like below.

- 3 Press [Red] key to display details information for EPG Now.

- 4 Press [Green] key you can change the current channel's property, such as FAV/ Lock/ Skip/ Delete/ Rename.

- 5 Press [Yellow] key can open the "Find" window like below. You can press [Up/Down/left/right] keys to move highlight and press [OK] key to input the letter. Select OK and press [ok] button to find you want.

- 6 Press [Blue] key can open the "Sort" windows like below. There are five kinds of sorting ways. You can press [Ch+/Ch-] key to move highlight and press [OK] key to

confirm you selection.

The five kinds of sorting way are:

- ⑦ Number: Sorting by scanning result.
  - ⑦ Free+PayTV: Sort channel through free and scramble sequence. Free channel will in the front of channel list and scramble channel will at the rear of channel list
  - ⑦ PayTV+Free: Sort channel through scramble and free sequence. Scramble channel will in the front of channel list and free channel will at the rear of channel list el List.
  - ⑦ Name (A-Z): Sorting in Alphabetical Order, ignore "\$" symbol.
  - ⑦ TP: Sorting by TP order.
- 7 Press [CH+/CH-] key to move highlight and press [OK] key to play the highlighted channel.
  - 8 Press [Page Up/Down] key to page up and page down.
  - 9 Press [Exit] key to exit the channel list.

### 8.13 Page Up/Page Down

In Channel list, press [Page+/Page-] key can page up and page down the channel list.

### 8.14 TXT

- 1 Press [Yellow] key in full screen, you can open teletext page on the channel which has teletext information.
- 2 If the channel has no teletext information, it will show "No Teletext Data" on the screen.

### 8.15 Subtitle

- 1 Press [Green] key in full screen, you can open subtitle page on the channel which has subtitle information.
- 2 If the channel has no subtitle information, it will show "No subtitle Data" on the screen.

### 8.16 Zoom

- 1 The [0] key allows you to magnify a certain area on the images
- 2 Press [0] key again, the image will enlarge rotate as x1, x2, x4, x6, x8, x12, x16.
- 3 In "x2 ~ x16" image, using [Up/Down/Left/Right] keys to move the image center area you want to see.
- 4 In zoom mode, press [Exit] to close "Zoom" window.

### 8.17 Menu

- ⑦ Press [MENU] key can open the menu, exit the current menu to last menu or close the window.

## 8.18 Video Format

- 1 Press [v.Format] (blue) key under Full Screen playback for 1st, it will show the current system outputting video resolution, continuously press this key, system will switch its outputting video resolution by sequence "Auto-> By Native TV -> 720P\_50-> 720P\_60-> 1080i\_50-> 1080i\_60-> 1080p\_50->1080p\_60".

## 8.19 Exit

- 1 Press [EXIT] key can exit the current menu to last menu or close the window.

## 9. Finder

- 1 Press [VOL+/VOL-] key to select finder
- 2 Press[CH+/CH-] key to select one item.
- 3 Press [menu] key to back to main menu.

## 9.1 Satellite Installation

### Satellite list

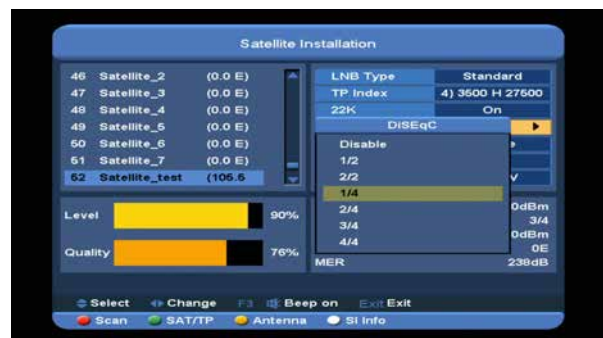

- 1 You can move highlight by press [CH+/CH-] key or Press [P+/P-] key to page up or page down and [OK] key to select the Satellite.
- 2 Press [left] or [green] button to enter TP List.  
*Note: You can't edit and scan the TP when you press [left] button, it only show the list.*
- 3 Press [right] button to enter into DiSEqC Setting menu.

**Auto DiSEqC:** Press [ok] key to run Auto DiSEqC function, it can find the satellite connect to which port automatically.

**DiSEqC1.0:** Press [VOL+/VOL-] button to select one item among Disable, 1/2, 2/2, 1/4, 2/4, 3/4, 4/4.

**DiSEqC1.1:** Press [VOL+/VOL-] button to select one item among Disable, 1/8, 2/8, 3/8, 4/8, 5/8, 6/8, 7/8, 8/8, 1/16, 2/16, 3/16, 4/16,

5/16, 6/16, 7/16, 8/16, 9/16, 10/16, 11/16,  
12/16, 13/16, 14/16, 15/16, 16/16.

**Motor:** Press [VOL+/VOL-] button to select one item among Off, DiSEqC1.2, USALS.

- 4 Press [F3] button to switch between Beep on and Beep off.
- 5 Press [red] button to display the scan menu, and then setting parameter, at last select Manual Scan or Blind Scan to scan channels of the selected satellites or TP. If you select Blind Scan, NIT Search needless edit.

**Note:** Manual Scan can only scan channels of the TP that in the TP list, but Blind Scan can scan channels needless TP, it can search the has signal TP.

**Scan Mode:** Press [VOL+/VOL-] button to switch it between All and Free (means you want to scan all channels or only scan free channels).

**Program Type:** Press [VOL+/VOL-] button to switch it among TV + Radio, TV Channel, Radio (means you want to scan all channels, all radio or only scan TV/Radio channels).

**NIT Search:** Press [VOL+/VOL-] button to switch it between On and Off. If selected On, meaning receive the latest transponder information.

- 6 Press [yellow] button to switch to antenna parameter list of highlight satellite.

**LNB Type:** Press [ok] button and then press [VOL+/VOL-] button to select one item among Universal, standard, user, unicable. For Example: If you use the unicable LNB, then you should select "Unicable" option in "LNB Type" and will display the submenu for Unicable setting.

**TP Index:** Press [VOL+/VOL-] button, or press [ok] button and then press [CH+/CH-] button to switch TP.

**22K:** Press [VOL+/VOL-] button, or press [ok] button and then press [CH+/CH-] button to select on or off. When this item is switched to "ON", Xfinder will receive TV and radio input signal from 22K port. If the item is switched to "Off", the Xfinder will receive all signals from 0K port.

**Note:** When LNB Type is universal, 22K can't edit.

**DiSEqC1.0:** Press [VOL+/VOL-] button to select one item among Disable, 1/2, 2/2, 1/4, 2/4, 3/4, 4/4.

**DiSEqC1.1:** Press [VOL+/VOL-] button to select one item among Disable, 1/8, 2/8, 3/8, 4/8, 5/8, 6/8, 7/8, 8/8, 1/16, 2/16, 3/16, 4/16, 5/16, 6/16, 7/16, 8/16, 9/16, 10/16, 11/16, 12/16, 13/16, 14/16, 15/16, 16/16.

**LNB Power:** Press [VOL+/VOL-] button, or press [ok] button and then press [CH+/CH-] button to switch it among 13V/18V, 13.5V/18.5V, off.

- 7 Press [blue] button to enter into edit menu.  
When in the satellite list it enter edit satellite menu, or it enter edit TP menu.
- 8 Press [white] button enter into SI Info menu.  
It shows the information of current TP. Like frequency, provider name, network name, network ID, Stream ID, Network TP Count, TV list, radio list, level, quality, RF Level, FEC, C/N, BER, MER. Press [red] button to display the Network TP List.

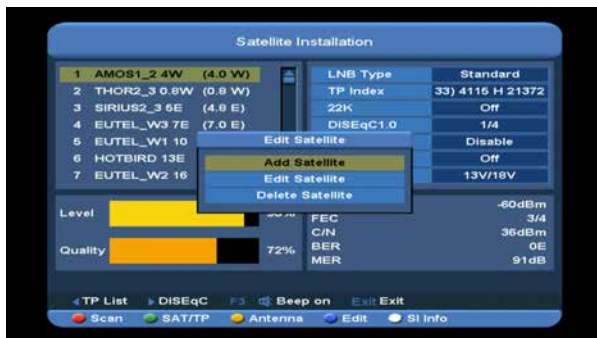

[VOL+/VOL-] button select the letter and press [ok] button to input it, when finish select "ok" and press [ok] button.

**Longitude:** Press number keys to input the longitude, and press [VOL+/VOL-] button to select east or west.

3. In "Delete Satellite" item, press[ok] key and select "yes" to press [ok] button to delete the selected Satellite.

*Note: If you selected more than one satellite, it will delete the highlight satellite.*

### Edit Satellite

Press [CH+/CH-] key to select one item among Add Satellite, Edit Satellite, and Delete Satellite.

1. In "Add Satellite" item, press [ok] key to add a new Satellite.

**Name:** Press [ok] button to enter into key board menu to input the name. Press [V-/V+]button to select the letter and press [ok] button to input it, when finish select "ok" and press [ok] button.

**Longitude:** Press number keys to input the longitude, and press [VOL+/VOL-] button to select east or west.

2. In "Edit Satellite" item, press[ok] key to edit the selected Satellite

*Note: If you selected more than one satellite, it will edit the highlight satellite.*

**Name:** Press [ok] button to enter into key board menu to input a new name. Press

### TP list

Press[CH+/CH-] key to select one item among Add TP, Edit TP, Delete TP and Delete All TP.

1. In "Add TP" item, press [ok] key to add a new TP.

**Frequency:** Press [VOL+/VOL-] button or press number keys to set the frequency.

**Symbol Rate:** Press [VOL+/VOL-] button or press number keys to set the rate.

**Polarity:** Press [VOL+/VOL-] button to select **Horizontal** or **vertical**.

*Note: The parameters of "Frequency" and "Symbol Rate" can set by number keys. The available range are "3000~13450 MHz" and "1000~45000Ks/s".*

2. In "Edit TP" item, press[ok] key to edit the selected TP

*Note: If you selected more than one TP, it will edit the highlight TP.*

**Frequency:** Press [VOL+/VOL-] button or press number keys to set a new frequency.

**Symbol Rate:** Press [VOL+/VOL-] button or press number keys to set a new symbol rate.

**Polarity:** Press [VOL+/VOL-] button to select Horizontal or vertical.

**Note:** The parameters of "Frequency" and "Symbol Rate" can set by number keys. The available range are "3000~13450 MHz" and "1000~45000Ks/s".

- In "Delete TP" item, press[ok] key and select "yes" to press [ok] button to delete the selected TP.  
*Note: If you selected more than one TP, it will delete the highlight TP.*
- In "Delete All TP" item, press[ok] key and select "yes" to press [ok] button to delete All TP.

## 9.2 Terrestrial Installation

Press [OK] key to enter the selected item.

- You can select the Bandwidth according different country.
- You can set the Tuner Power ON/OFF.
- Press [Red] key can directly into blind scan mode to scan the current programs.
- Press [Green] key to enter the following menu.

### ⑦ Scan Mode.

- There are two modes. You can scan channel by channel or by frequency".
- When scan band is UHF and region is "France", the range of Ch No. is from 21 to 69. When scan band is VHF and region is "France", the range of Ch No. is from 1 to 9. (it's according to region)
- Press [Red] key to enter blind scan menu, or press [Green] key to enter TP scan menu.
- Press [Exit] key to exit the scanning.

## 9.3 Cable Installation

Press [OK] key to enter the selected item.

- You can input the Frequency by use the numeric button of the RCU. You can select the QAM value among 16QAM, 32QAM, 64QAM, 128QAM and 256QAM. You can turn ON or OFF the NIT Search, if you set the Scan Mode to Manual Scan.

2. Press [green] button to add a new TP.
3. Press [Yellow] button to delete the select TP

- ⑦ GMT Usage: This item is use for open the usage of GMT. You can press [Volume Up / Volume Down] keys to switch “On/Off”.
- ⑦ The “GMT Offset” item is valid only when the setting of “GMT Usage” is “Yes”. You can

press [Volume Up / Volume Down] keys to switch “GMT Offset” value, and the range is “-12:00 ~ +12:00”, increase each half hour progressively.

- ⑦ You can press [Left/Right] to control Summer time on or off.
- ⑦ “Date” and “Time” items are valid only when the setting of “GMT Usage” is “No”. You can press [Volume Up / Volume Down] keys to moving highlight and use number keys to input directly.

*If the current channel provides the correct time information, you will see the current time while you enter “Time” menu. If the channel doesn’t provide time information, you have to input the date and time information manually.*

- ⑦ Press [exit] key to draw back from “Local Time Setting” Menu.

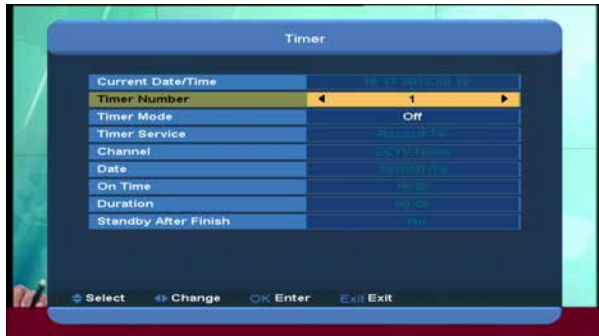

## 14.9 Timer

Press [enter] key to open timer menu.

- ⑦ Current time information will display on the first column; if the current time is incorrect, please modify the time information in “Time” item.
- ⑦ Timer Number: You can press [Volume Up / Volume Down] keys to set Timer number, and there are 8 timers in total.
- ⑦ Timer Mode: There are several modes for Timer to setting, include Off, Once, Daily, Weekly, Monthly and Yearly.
- ⑦ Timer Service: There are two options for “Timer Service”, include “TV Channel” and “Radio Channel” (timer setting for channel change and Wakeup/Sleep) and "Record Radio" and "Record TV" (Timer setting for Record the TV or Radio program to USB

Hard Disk) and Message (reminding message).

- ⑦ When you select “Channel” (timer setting for channel change and Wakeup/Sleep) option in “Timer Service”, the screen will display like below:

- i. Channel: press [OK] key to enter channel list and select channel that you want to setting.
- ii. Date: use number keys to input your wakeup date.
- iii. On Time: use number keys to input your wakeup time. Once the time's up, no matter what the system is in standby mode or in playing mode, the system will automatically switch to the channel you want and start to play.
- iv. Duration: After you set a time for “Duration” item, once the time's up, the system will automatically switch to standby mode. If you want not work this function, set the duration is **00:00**.
- ⑦ When you select “Message” (reminding message) option in “Timer Service”, the screen will display like below:
- v. Wakeup Message: press [Volume Up / Volume Down] key to select reminding message as Birthday, Anniversary and General.
- vi. Date, you can use number key to input your wakeup date.

- vii. On Time: use number keys to input your wakeup time. Once the time's up, no matter what the system is in standby mode or in playing mode, the system will automatically pop a reminding message.
- viii. The message will always display on the screen, you can press [Exit] key to close it. Press [exit] key to exit the current menu.

## 14.10 Constellation

When you enter to “Constellation” menu, you will see the screen like below: It show the picture of constellation.

DVB-S Constellation

DVB-S2 Constellation

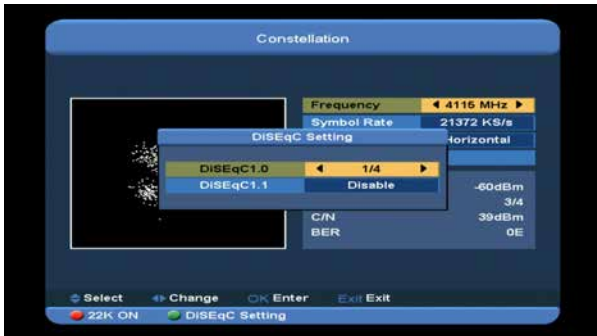

**Note:** If current TP has not signal, it will show ruleless white dot. And the stronger the signal, the higher the concentration of white spots.

### 22 k

You can use [red] key to switch “on/ off”. When this item is switched to “ON”, Xfinder will receive TV and radio input signal from 22K port. If the item is switched to “Off”, the Xfinder will receive all signals from 0K port.

### DisEqc Setting

Press [green] key enter “DisEqc Setting” Menu, you will see the screen like below:

1.DiSEqC1.0: You can use[Volume Up/ Volume Down]key to switch options. There are several options for your selection:

- b) Disable: without DiSEqC.
- c)1/2, 2/2: two ports DiSEqC
- c)1/4, 2/4, 3/4, 4/4: 4 ports DiSEqC

2.DiSEqC1.0: You can use[Volume Up/ Volume Down]key to switch options. There are several options for your selection:

- a) Disable: without DiSEqC.
- b)1/8, 2/8... 8/8: 8 ports DiSEqC
- c)1/16, 2/16....16/16: 16 ports DiSEqC

### Frequency

You can input number keys to the Frequency, The available range are “3000~13450 MHz”

### Symbol Rate

You can input number keys to set the Symbol Rate, the available range are “1000~45000Ks/s”

### Polarity

In “Polarity” item, press [Left/ Right] key to select Horizontal or Vertical”.

### Start

Press [ok] key to start to draw the Constellation.

## 15. New Features

### 15.1 Time Shift

If you connect the USB HDD, and enable the Time Shift function in the menu "Main Menu/ Media/ PVR Setting/Time Shift",

It will start the Time Shift function automatically after you switch the program, and when you press the " ▶ " button the Time Shift info bar will displayed as the following picture:

- 1 You can press " || " button to pause the video, and can save the picture to flash by press "P+ " button when the video is paused.
- 2 You can press "◀◀ " or " ▶▶" button to Fast Backward or Fast Forward.
- 3 You can press "◀ " or " ▶" button to Slow Backward or Slow Forward.
- 4 Press “left” or “right” button to jump to different position, then press “OK” button to confirm.
- 5 Press "■" button to exit the playback.

### 15.2 Record

If you connect the USB HDD. you can press "●" button to start record function, as following picture:

- ⑦ Press "▶" button to display the record info bar when you recording.
- ⑦ Press "●" button again to setting the record time.

- ⑦ You can press "⏸" button to pause the video, and can save the picture to flash by press "P+" button when the video is paused.

- ⑦ You can press "⏮" or "⏭" button to Fast Backward or Fast Forward.

- ⑦ Press "left" or "right" button to jump to different position, then press "OK" button to confirm.
- ⑦ Press "■" button to stop the recording.

## 16. Trouble Shooting

If you suspect there is a fault with your Xfinder, please check the following trouble shooting guide before calling authorized service agent.

Warning! Under no circumstances attempt to repair the Xfinder yourself. Tampering with the Xfinder may result in fatal electric shock and will invalidate your warranty.

Symptom	Possible cause
Settings you made in the menu have not change	The Xfinder lost power before being able to enter into standby mode Some of the Settings saved by user can be deleted partly or fully
No signal	The level of signal is weak LNB is out of order The cable from the LNB or Terrestrial is incorrectly Connected (short circuit or open circuit) The position of dish is aligned incorrectly
Xfinder is on but no picture or sound except the following messages (NO TV program)	Channel is not available Channel is scramble
Xfinder not responding to remote control unit	RCU batteries are dead or inserted incorrectly The RCU is pointing toward wrong direction
Poor picture Quality	The level of Signal strength is low
No sound	The cable is connected incorrectly The Volume level is low Muting function is active
No display on the VFD Display Panel	The power cord is not plugged in correctly.
No picture on the screen	Xfinder is in Standby mode RCA Jack or cable is not connected firmly to the video output port of television Incorrect channel or video output is selected on television Brightness level of your TV set is incorrectly defined

## 17. Specifications

<b>SYSTEM RESOURCES</b>	
<b>Main Processor</b>	400M Hz based CPU
<b>Flash Memory</b>	64M Bits
<b>DDR SDRAM</b>	1024Mbits
<b>Tuner/Front-end</b>	
<b>Tuner Type</b>	DVB-S / DVB-S2
<b>Input Connector</b>	F-type, Connector, Female
<b>Loop Through</b>	F-type, Connector, Female
<b>Frequency Range</b>	950 MHz ~ 2150 MHz
<b>Signal Level</b>	-65 to -25 dBm
<b>LNB Power &amp; Polarization</b>	Vertical: +13V
	Horizontal: +18V
	Current: Max. 300mA
	Overload Protection
<b>22KHz Tone</b>	Frequency: 22±1KHz
<b>DiSEqC Control</b>	Amplitude: 0.6±0.2V
	Version 1.0, 1.1 1.2, USALS Available
<b>Demodulation</b>	QPSK, 8PSK
<b>Input Symbol Rate</b>	2-45 Mbps, Convolution Code Rate
	1/2, 2/3, 3/4, 5/6, 7/8, 1/4, 1/3, 2/5, 3/5, 4/5, 8/9, 9/10 and Auto
<b>Tuner Type</b>	DVB-T/DVB-T2
<b>Input Connector</b>	IEC-Type, Connector, Female
<b>Loop Through</b>	IEC-Type, Connector, Male
<b>Signal Level</b>	Nordig Compliant DBOOK Compliant
<b>Forward Error Correction (FEC)</b>	DVB-T: Viterbi + Reed Solomon 1/2, 2/3, 3/4, 5/6, 7/8.
	DVB-T2: LPDC + BCH 1/2, 3/5, 2/3, 3/4, 5/6.
<b>Input Frequency</b>	47-862MHz
<b>Constellation</b>	QPSK, 16-QAM, 64-QAM, 256-QAM
	Both rotated and non-rotated
<b>Guard Interval</b>	1/4, 19/256, 1/8, 19/128, 1/16, 1/32, 1/128
<b>FFT Mode</b>	1k, 2k, 4k, 8k normal and extended, 16k normal and extended, 32k normal and extended.
<b>Channel Bandwidth</b>	6 / 7/ 8 MHz
<b>Antenna power output</b>	5V/50mA max
<b>Demodulation</b>	COFDM 2K/8K
<b>Number of carriers</b>	1705/6817
<b>FEC Decoder</b>	1/4, 2/3, 3/4, 5/6, 7/8, k=7
<b>Tuner Type</b>	DVB-C
<b>Input Connector</b>	IEC-Type, Connector, Female
<b>Loop Through</b>	IEC-Type, Connector, Male
<b>Frequency Range</b>	47-862MHZ
<b>Signal Level</b>	"-20dBmV to +20dBmV"

<b>Bandwidth</b>	8MHZ
<b>Demodulation</b>	QAM
<b>Constellations</b>	8,16,32,64,128,256
<b>Input Symbol Rate</b>	1.5 - 7 Ms/s
<b>POWER SUPPLY</b>	
<b>Input Voltage Adapter</b>	Free Voltage (100~240V AC, 50/60Hz)
<b>Power Consumption</b>	20W MAX
<b>Power charger output</b>	14.5V DC 4.0A
<b>Battery</b>	11.1 V/5.5 AH
<b>Battery charging time</b>	3.5H
<b>Battery standard discharging time</b>	6~7H
<b>MPEG TS A/V Decoding</b>	
<b>Transport Stream</b>	MPEG-2, H.264
<b>Input Rate</b>	Max.120Mbit/s
<b>Aspect Ratio</b>	4:3, 16:9, Letter Box
<b>Video Decoding</b>	MPEG-2, MP@ML, MPEG-4 part 10/H264
<b>Video Resolution</b>	720*480P/I, 720*576P/I,1280*720P,1920*1080I, 1920*1080P
<b>Audio Decoding</b>	MEPG-1 layer I/II, Mpeg2 layer II, Dolby digital, Dolby digital plus
<b>Audio Mode</b>	Left / Right / Stereo/ Mono
<b>Sampling Rate</b>	32, 44.1 and 48KHz
<b>A/V &amp; DATA INPUT/OUTPUT</b>	
<b>A/V IN/OUT</b>	Video CVBS input/output
	Audio L/R input/output
<b>RS-232C</b>	Transfer rate 115.2Kbps
	3.5mm"Phone Jack Type
<b>Audio output</b>	Built-in speakers
<b>RJ-45</b>	10M/100M
<b>USB</b>	One USB 2.0 slot Compatible for Host
<b>U disk</b>	2G Bytes
<b>HDMI</b>	VER1.3
	Type A
<b>PHYSICAL SPECIFICATION</b>	
<b>LED display</b>	7 inch
<b>Size[W*H*D]</b>	242mmX 160mmX46mm
<b>Net Weight</b>	<2.0KG
<b>Operation Temperature</b>	0□ ~+45□
<b>Storage Temperature</b>	-10□ ~+70□
<b>Storage Humidity</b>	5%~95% RH (Non-Condensing)
